

Bullworthy - Installations Engineer.

T.R Bullworthy Ltd is a market leading supplier of Garage Equipment with a 31 year history based on the Northamptonshire Oxfordshire borders.

We require a skilled installation engineer to join our team installing into prestigious dealership groups and top end independent garages / workshops, whilst also sharing the opportunity of joining a network of national Trade Garage Equipment engineers.

The Ideal Candidate would ideally:

- Have a good working knowledge and experience of vehicle lifting equipment (2 post, 4 post and scissor lift).
- Be customer focussed and have a good level of communication skills.
- Be confident and able to work under your own initiative, as well as being able to take part as a team.
- Be able to interpret CAD drawings and understand product manuals.
- Have full driving license.
- Understand site H&S and have a general knowledge of current lifting related standards i.e. PUWER & LOLER.

Description of Duties:

- Carry out installations on new workshop equipment.
- Occasionally be able to stay overnight away from home.
- You will be able to gain product training as well as GEA accreditation status.
- Be part of a growing network of national Trade Garage Equipment engineers.

Package:

- Very attractive salary dependant on skills and experience
- Mobile phone
- Touch pad tablet and service software with training
- Company work wear and PPE
