

TECHNIQUE T1001 - 2 Post Lift

The T1001 enters the hydraulic vehicle lifting market at a very high level of quality but at a price that all workshops can afford. The 2 post lift embraces an ergonomic design incorporating compact dimensions, fast operation, reduced design height and multi-supporting arms to enable the user to lift a vast array of vehicles.

Heavy duty safety latches within both columns is just one of three systems built in for safety.

Twin ram - electro-hydraulic design means fast operation, hard wearing and low cost of ownership

Safe, two handed operation from a single column

Each lifting column features a maintenance free high pressure cylinder and maintenance free Tivar 1000 polyethylene carriage guides

Low profile lifting arms and screw adaptors with three stage telescopic arm assembly to enable the lifting of small cars to light vans.

Split adaptor kit and U crutch adaptors available

- Made for Trade Garage Equipment Ltd by the worlds largest lifting company
- 3 stage telescopic arm assembly - front & rear
- 3500kg lifting capacity
- 2 Year parts and labour warranty
- Fully electro-hydraulic design
- Free set of 8 high lift adaptors worth £200

£2,395.00 or £12.99 per week*

Technique T8003 combined emissions analyser

The technique T8003 is the first in a new generation of emissions analysers and MOT roller brake testing equipment marking a stepped change in performance, operation and ergonomic practicality. Everything about the T8003 is 'in touch' with modern technology and designed to help propel your business into the future.

The revolutionary 'totum' design is the host and centre piece to a multitude of MOT related tasks incorporating the latest USB and wireless connectivity, and allows easy serviceability including remote engineering access.

Utilising the latest 'touchscreen' technology on the standard 23" screen each high definition graphic has been thought through for clarity and instant recognition whilst testing. Data entry is simple and on par with technology commonly used within the users workplace and home, therefore making the machine functionally friendly.

Included options

- New 'touchscreen' technology providing quick and easy access to screen functions.
- Wireless oil and temperature measurement with a multi locational storage system.
- Revolutionary slim-line 'totum' platform, no tower PC or cumbersome trolley.
- Infra-red remote hand set giving maximum control and flexibility.
- Digital diesel smoke meter with wireless communication.

Options Available

- Take control from the driving seat with the optional wireless tablet PC
- Wireless QWERTY keyboard with shelf for alternative data entry.
- Wireless EOBd interface kit.
- Mobile wheeled base kit for multi-lane testing.
- New Point and Press temperature measurement
- 5 YEAR TOTAL CARE package with DELL 23" Touchscreen.

Standard 2 years parts and labour warranty

£5,295.00 or £28.71 per week*

Optional Tablet also available

TECHNIQUE PROFESSIONAL TYRE EQUIPMENT PACKAGE

T2520 PRO tyre changer and T2120 wheel balancer

T2520 PRO

Built for the tyres of tomorrow, not just today, the T2520 Pro is designed to cater for all types of rim and tyre, including the notoriously tough Run-Flat and difficult low profile tyres which are becoming increasingly common.

Totally 'leverless', the T2520 Pro eliminates the stress and opportunity for damage associated with traditional 'levered' machines. In addition, the heavy duty construction and oversized clamping ensures this model is capable in any environment.

Features at a glance

- Totally 'leverless' operation
- Clamping range of 10" to 26"
- Includes robotic assist arm
- Heavy duty construction with tapered column for max. strength
- Supplied with comprehensive on-site training

T2120 HIGH PERFORMANCE

The T2120 is a high performance wheel balancer of heavy duty construction and premium specification. This model boasts 3D data input, with automatic entry of offset, width and diameter being achieved via an inner and outer measuring arm. The colour TFT display provides 'live' readings, with imbalance positions highlighted in impressive graphics which make the hidden weight placement (or SPLIT function) easier to carry out than ever before, as well as offering excellent merchandising appeal to the customer.

The cabinet offers an imposing presence, with a modern design, good capacity for weight storage, and an additional storage facility on the side for additional weights, cones or accessories.

Features at a glance:

- Automatic 3D Data Input via inner and outer measuring arms
- Live' graphics show rim movement and weight positions on-screen
- Premium quality 40mm shaft
- Behind Spoke Balancing (SPLIT) Function
- Heavy duty construction with additional storage for cones, tools and accessories

£5995 or £32.51 per week*

TECHNIQUE MOBILE WASTE OIL DRAINER

- Large Tank Capacity of 95 litres
- Increased offset hopper capacity of 18 litres
- Ability to drain at 45 litres/min with hopper bowl extended
- Will allow the user to drain oil up to 20 degrees centigrade
- Maximum width of unit = 530mm over wheels
- Operating height of unit = 1072mm to 1720mm
- Fully encapsulated
- High quality integral 1:1 air operated pump unit for fast drainage
- Includes integrated preset air regulator unit and air coupling for ease of use
- 1/4" QRC air inlet; 3/4" QRC oil outlet
- Pump output at coupling = 15 Litres/min
