

T8000 Series

Combined Brake Tester & Gas Analyser

Created in a partnership with Trade Garage Equipment and some of the world's leading and most respected manufacturers, the new exclusive T8000 range of MOT brake testing and emissions analysing equipment represents a step change in performance, operation and ergonomic practicality.

Options are also available to extend you into Class I and II testing, suspension testing and steering geometry analysis. Everything about the T8000 puts you in 'touch' with essential vehicle testing technology to help propel your business into the future to maximise your opportunities and profitability.

The revolutionary totem design incorporates the latest USB and wireless connectivity and is the host and centrepiece for a multitude of MOT tasks whilst also permitting ease of serviceability and remote engineering access.

Utilising modern 'touchscreen' technology on the standard 20" screen provides uncomplicated and quick access to test routines or results whilst each high definition graphic has been thought through and devised to provide clarity and instant recognition of essential visual information. Data entry is simple and on a par with contemporary technology found in the home as well as the workshop making the equipment familiar and user friendly in design.

BRAKE TESTER BEDS:
