EQUIPMENT SPECIALISTS

WHEELS OF FORTUNE !

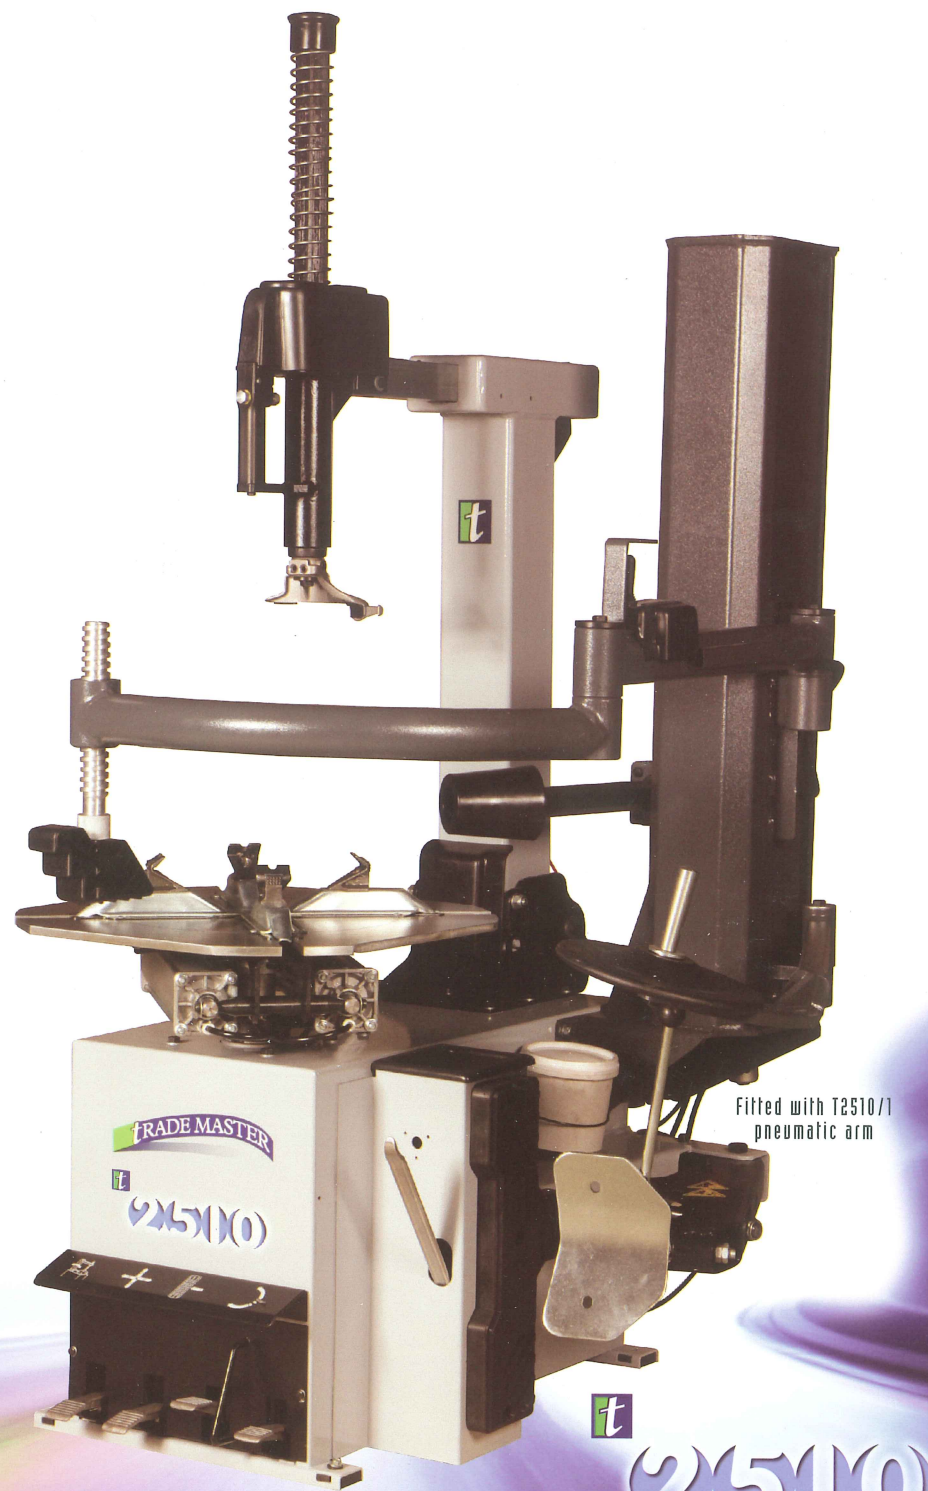

Modern wheels, with sophisticated rims and high performance tyres, are placing greater demands on wheel care products than ever before. Suitable equipment must have an efficient, wide ranging performance, minimise the risk of damage yet be able to tackle cosmetic demands such as hidden balance weights. The new reasonably priced Trademaster wheel care range meets the challenge – and could help you to make a fortune!

The Trademaster range of wheel care equipment contains products to suit the smallest garage to the largest tyre shop.

For service garages wheel care can offer an additional and lucrative stream of income. Our latest additions to the range include tyre changers and wheel balancers which have been selected not only for their quality, reliability and performance but for their outstanding value. Investing in Trademaster equipment, which is backed by excellent service support, provides peace of mind for both you and your customers.

Tyre Changer >

The new Trademaster T2510 Fully Automatic Tyre Changer offers sound performance combined with versatility. An air operated tilt back column speeds up set-up time whilst the turntable offers 24in clamping to accommodate the biggest wheels. If you need to deal with stiff, low profile or run-flat tyres there is a powerful, pneumatically operated robotic arm – T2510/1, which can be supplied initially or retro-fitted.

Fitted with T2510/1
