GROOVE GLOVE HAND HELD SCANNER

GROOVEGLOVE[™]
MOBILE TIRE DIAGNOSTICS

tSCAN

THE FUTURE OF TYRE AND ALIGNMENT DIAGNOSTICS

Groove Glove is a hand held scanner that allows tyre retailers and their customers to easily and quickly understand the wear condition of tyres. Operated wherever a WiFi signal exists it avoids errors and provides sales opportunities for replacement tyres and wheel alignments.

FIVE REASONS YOU SHOULD USE GROOVE GLOVE

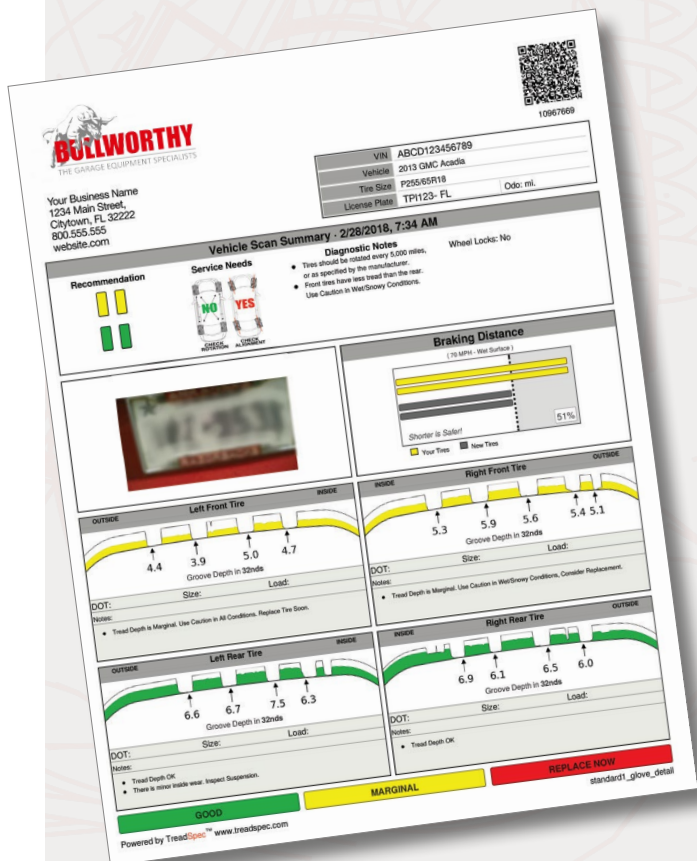

- ✓ **Fast - Less than 1 minute per examination.**
- ✓ **Integrated camera - For license plate recognition.**
- ✓ **Accurate - Scans 600 points across each tyre.**
- ✓ **Flexible - Scan tyres wherever you need to.**
- ✓ **Transparent - A full TreadSpec report available within seconds.**

COMMUNICATING TO THE CUSTOMER IS EASY WITH GROOVE GLOVE

A key feature of the Groove Glove is the cloud based automated report. It is easy to read and analyse tyre and vehicle alignment status and allows you to consistently and professionally educate the customer, further building a relationship based on transparency and trust, the report includes:

- Recording of vehicle and tyre details.
- Capture of vehicle registration image.
- A summary of recommendations based on tyre replacement, alignment, and wheel rotation.
- An analysis for each wheel which includes commentary on alignment, over and under inflation of tyre pressure etc.
- The impact of the current condition of the tyres on brake efficiency.
- A completely customisable “traffic light” system of colour bases depicting the level of wear of the vehicles tyres.

Of all “Yellow” tyres are due for potential replacement in the next few months.

Of all tyres scanned are “Red” – Having less than the legal tread depth.

More than 50% of all vehicle tyre wear indicates a possible wheel alignment service.

IT ONLY TAKES JUST 1 MINUTE!

EASY ACCESS

The Glove is placed on the tyre so that the indicator guidance is well beyond the inside of the tread. Press and hold the two buttons on the sides (a scan buzzer is then emitted) and slide the glove to the outside of the tyre until the guide is outside the edge. Simply release the two buttons and the scan buzzer will stop. This completes the scanning of the tyre.

FULLY INTEGRATED DEVICE

Groove glove has a built in camera unit which allows you to capture an image of the vehicle number plate. Sophisticated OCR software then lists the vehicle registration number on the TreadSpec report. Groove glove employs precision twin lasers married to an inertia pack containing accelerometers and gyroscopes.

CLOUD BASED SOFTWARE

Each groove glove comes with its own cloud based web suite which provides various dashboards and reports. Some examples of it’s features include:

- Download and email scan reports to customers.
- Filter follow up opportunities based on minimum tread wear.
- Assess site performance in terms of the number of vehicles scanned, tyres sold, and alignments sold as incentives for individual staff members.
