A Word From Our Sales Director

"The summer is coming, bright sunshine and warm weather is just around the corner. There's a real sense that the pandemic is becoming a part of our history rather than paving an awkward future for each of our lives. That is why Bullworthy' has created some unbelievable Sunny Super Deals and are introducing some exciting new products and equipment packages to cheer up your workshop and help generate a healthier return on your investment. Safety is always at the forefront of our minds, that's why we only offer premium equipment, carefully sourced from world renowned manufacturers, built to last with a proven track record, and ultimately installed by our very own highly trained GEA (Garage Equipment Association) accredited engineers. So, look out for our Sunny Platinum Jubilee emblem for our hand-picked and unmatched deals.

From our successes in 2021, the Technique brand is growing from strength to strength. Our Italian manufactured tyre equipment and wheel alignment systems are thoroughbreds, backed up with Technique equipment managers each with years of experience in their field reassuring you that each of the products is the first choice in the marketplace. Our Rotary lift success continues to reach new record highs too. Due to our customer's continued investment into premium lifts during 2021 this has meant, along with our partners at Trade Garage Equipment, Rotary lift sales now exceed 11,000 vehicle lifts placed into the UK marketplace over the past 20 years. What a tremendous result, and each of the TGE members are continuing this success well into 2022 once again making the members of TGE one of Rotary Lift Company's largest distribution networks in Europe."

XS30N Mid Rise Scissor Lift

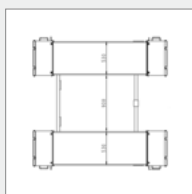

The Rotary Low Profile scissor lift specifically covers the requirements in the field of tyre and body work services. However, it is also an ideal workplace for maintenance work and work on the vehicle interior in the workshop. A reasonable investment allows the quick set up of an additional universal workspace without foundation work.

Folding ramp extensions.

Double acting hydraulic system.

New extended platform width and length.

Ergonomic control panel.

Mobile kit included as standard!

Technique Scissor Lifts

T1210 Mid Rise Scissor Lift

The T1210 can be recessed in the same tradition as a full height scissor lift. Locking run on ramps allow the platform to be extended front and rear of the platform area. The hydraulic synchronisation system with automatic levelling function prevents an uneven lifting or lowering of the load.

- Platform range is 1460mm up to 2050mm.
- Scissor platforms and bases incorporate generously sized self-lubricating sliders for reduced wear.
- Hydraulic levelling system with dual master (two cylinders per platform) for total safety without the need for mechanical latches.
- 40mm rubber lifting blocks as standard.

MODEL	PLATFORM WIDTH	PLATFORM LENGTH	OVERALL WIDTH	CAPACITY	PRICE	PER WEEK
DS35HG	630mm	1500mm - 2160mm	2060mm - 2160mm	3.5T	£POA	£POA

T1220 Low Profile Scissor Lift

The T1220 low profile dual scissor lifts have been developed to cater for all applications and needs. Special attention has been made to parts of the lift where others fail, such as fully galvanising the base frame, galvanising the run on ramps, and including fully adjustable levelling screws which make this lift ideal for replacing old recessed scissor lift units.

- Runway and base with generously sized, self-lubricating sliding shoes.
- 4 travel limit adjuster screws for minimum runway height from floor, for perfectly level runways when lowered.
- Runways with suspended flaps which also act as vehicle access ramps.

Technique Wheel Care Equipment

Why Groove Glove?

Groove Glove is a hand held scanner that allows tyre retailers and their customers to easily and quickly understand the wear condition of tyres. Operated wherever a WiFi signal exists it avoids errors and provides sales opportunities for replacement tyres and wheel alignments.

Five reasons to use Groove Glove:

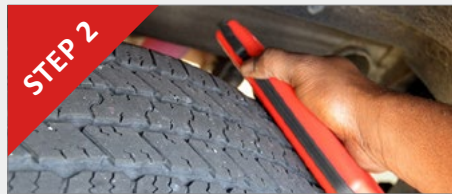

- **Fast** – Less than 1 minute walk around.
- **Flexible** – Scan tyre wherever you need to.
- **Integrated camera** – for licence plate recognition.
- **Transparent** – A full TreadSpec report available in seconds.
- **Accurate** – scans 600 points across each tyre.

How does it work?

Take a photo of the registration plate with our integrated camera.

Scan all 4 tyres in a chosen sequence to acquire shoulder to shoulder tread depth profiles

Share the TreadSpec report, available in seconds, with the customer to agree the purchase of replacement tyres and wheel alignment check.

Lease Cost Per Month (Based on £16.41 per week)	Average Wheel Alignment Charge Out	If You Only Sell x1 Wheel Alignment Checks Per Week	x4 Wheel Alignment Checks in a Month	12 Months Profit (48 Weeks)
£71.11	£75.00	£58.59 Profit	£234.36 Profit	£2,812.32 Profit

PLUS TYRE SALES!

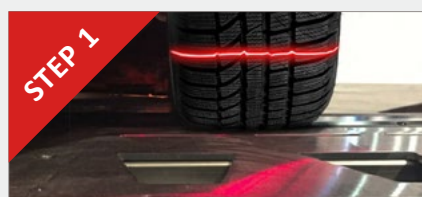

Why TreadSpec?

TreadSpec allows tyre retailers and their customers to easily and quickly understand the wear condition of tyres. It saves time, avoids errors and provides sales opportunities for replacement tyres and wheel alignments.

Five reasons to use TreadSpec:

- **Fast** – 5 second cycle time.
- **Convenient** – Capture 100% of vehicles entering workshop.
- **Automated** – No manual errors or missed tyres.
- **Transparent** – A full TreadSpec report available in seconds.
- **Accurate** – scans hundreds of points across each tyre.

How does it work?

Drive over the ramp at normal speed. The integral camera captures the licence plate.

Share the TreadSpec report, available in seconds, with the customer to agree the purchase of replacement tyres and wheel alignment check.

Lease Cost Per Month (based on £113.97 per week)	Average Wheel Alignment Charge Out	If You Only Sell x5 Wheel Alignment Checks Per Week	x20 Wheel Alignment Checks in a Month	12 Months Profit (48 Weeks)

BULLWORTHY

THE GARAGE EQUIPMENT SPECIALISTS

MORE THAN JUST AN EQUIPMENT SUPPLIER

Bullworthy, specialists in garage equipment and workshop design, is now heading towards its fifth decade of trading within the industry. With a wealth of experience, extensive product knowledge and a fresh professional approach, you are assured of being offered the correct equipment for the task required. Whether your business is a frontline independent workshop or part of a larger dealer group, Bullworthy can offer the highest standard in workshop equipment to suit all budgets.

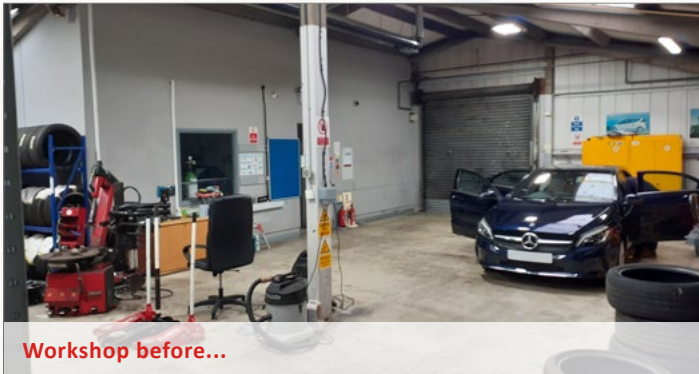

ALL THE SERVICES YOU NEED JUST FROM ONE COMPANY

- Workshop Design.
- Project Management.
- Civil & Construction Works.
- Specialist Pit Fabrications.
- Floor Finishing Solutions.
- Electrical Services.
- Installations.
- Aftersales Care.

FROM START TO FINISH

Bullworthy are project specialists. We know that each project will involve a variety of specialist skills to complete a workshop equipment installation. Bullworthy can offer a 'Start to Finish' concept. Using our own in-house capabilities and expertise, alongside our trusted contractors, Bullworthy can, literally, build you a workshop.

Workshop before...

Workshop after...

Workshop after...

Integrated Intelligence - The Next Dimension

The SIGMA CONTROL 2 features a highly flexible modular design, yet its standard construction means that this versatile control system can be matched to suit the needs of any rotary screw compressor or rotary blower from KAESER KOMPRESSOREN's extensive range. Comprising a main control unit and separate input/output modules, this modular concept therefore enhances communication and maintenance-friendliness.

Bullworthy and KAESER KOMPRESSOREN have earned a reputation for excellence in all fields of compressed air generation whilst providing expert, professional advice. Put simply and straightforward, Bullworthy and HPC can help you save energy, save money and to benefit the environment by reducing your businesses CO2 emissions.

Order Your Workspace Of Tomorrow!

Manufactured in module size, this allows a design for a technical solution to fit the needs of both, new-build workshops or indeed the constraints of an existing workshop. A successful workplace is one where employees feel valued and where their workspace is designed to work and help them deliver the service that customers expect. DEA's range of proven automotive workshop cabinetry achieves this and often exceeds expectations.

Talk to Bullworthy today for your unique workshop cabinet design.

TECHNIQUE Steel Top Heavy Duty Workbench

Heavy duty workbenches come fully welded (not flat pack) and ready to use. They are constructed from steel angle with braced 2mm galvanised steel top. The uniformly distributed load (UDL) is up to 1000kg for each workbench. These workbenches are perfect for heavier duty work. The standard height is 840mm, but this can be changed at no extra cost.

- 3 standard lengths and widths within range.
- Single cupboard (600mm x 600mm x depth of workbench.)
- Galvanised bottom shelf, rear lip and vice plate (welded under front right hand corner.)

1260SC	1200mm x 600mm with cupboard	£POA

TRUESTEEL®

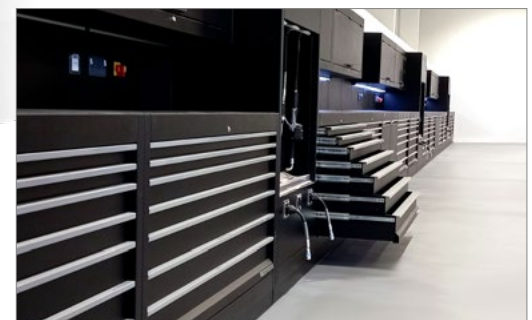

WHERE SIZE DOESN'T MATTER!

Technique and TrueSteel® have forged a new exciting partnership for high quality, British made, custom built workshop furniture solutions enabling an almost limitless design.

Combining the years of project and cabinet experience within Bullworthy, with the unique design and production facilities at Truesteel, Bullworthy are literally able to offer cabinets, toolboxes and services distribution that can fit any space, be it a large corporate dealership workshop, independent workshop, or the domestic workshop / garage. Furthermore, we can offer specialist cabinetry for the sports car industries, marine industry, agricultural industry, factory facilities, colleges, production areas... the list goes on.

Using state of the art software, Truesteel can tweak their designs down to the last millimetre at the touch of a button and can provide a 3D rendered walk through for complex designs. Unique scaling of toolboxes, cupboards, service distribution is no longer a problem. Truesteel quality design incorporates strength too, using a thicker gauge steel than their modular competitors, and toolbox drawer runners holding unrivalled capacities.

FROM THE DRAWING BOARD TO THE WORKSHOP

Talk to Bullworthy today for your unique workshop cabinet design!

Get online and visit our website today to view our full range of equipment!

Bullworthy can offer an extensive range of exhaust and fume extraction systems regardless of the size of your workshop. From fixed-point systems with drop-down reels, to completely mobile extraction systems for MOT testing purposes. We offer a free site survey from one of our experienced team, who will design and calculate the correct system to suit your extraction requirements. Bullworthy not only installs extraction systems but also offer maintenance and COSHH testing.

Systems for Exhaust Extraction.

A WORKY exhaust fumes extraction system guarantees the quality you are looking for at the right price with professional products that are tailored to the world of vehicle repair workshops. WORKY has the right solutions for all the types of workshops, small or big and according to the type of vehicle and services the workshop deals with. WORKY has multiple solutions for fixed systems, underfloor systems, sliding systems and stand alone / mobile systems.

Systems for Dust Extraction.

WORKY has devised a range of products and systems for extracting dust directly from the orbital polisher. Movable extractor fans and centralized systems guarantee this functionality with variables and models that always match your needs. The multifunctional centres also ensure the distribution of electric energy and compressed air to the work area to obtain a healthy, productive and efficient environment. Trust WORKY and the range of high performance products at the right price.

Systems for Weld Fume Extraction.

Extraction systems for welding fumes incorporating fume hoods, wall-mounted arms and sliding systems, as well as all our systems operating all over the world, are the best possible catalogue for WORKY's products, which are installed in huge numbers of companies that have improved the quality of life and the productivity of their workforce. WORKY's welding fumes extraction systems are perfect for the requirements of different production sectors, in particular automotive aftersales and industry.

SIMPLY TOUCHLESS

The GYNMA range of trolley mounted nozzles offer a universal and contactless solution for every car and motorcycle. The fact that it is mounted on a trolley allows for extreme mobility, and handling of every type of exhaust system without making contact. Just simply roll the trolley into position behind the vehicle. There are a multiple of configurations, diameters and temperature resistances allowing you to chose the right GYNMA for the workshop. This is just a few within the WORKY range to choose from:

Foldable design.

GYNMAG 2 x Round Nozzle Trolley.

GYMAG-GON 2 x Oval Nozzle Trolley.

GYNMA-150125125HT5 2 x High Temp Nozzle and Hose Trolley.

NEX.U provides you with the control and information you require to make your operation more profitable. You will be able to account for every drop of lubricant and other service fluids used. On top of this, you will carry an efficient inventory control, with automatic alerts and fluid re-ordering when needed, eliminating operation downtime. For almost any lubricant usage or operation size, with today's high costs for these fluids, NEX.U quickly pays for itself. Once it is paid for, savings go right to the operations bottom line in the form of profit, which was previously lost.

SAMOA **U-TRACK** web-based software means there is no need for a dedicated PC. Access the programme, management, control and reports from a remote PC, tablet or mobile phone from any location.

U-DAT

System keypad with full access to NEX.U and U-TRACK.

U-VALVE

All in one flow control unit. Includes Solenoid Pulse Meter and Filter.

UNET - Central processing unit.

U-TRACK

Use a license on any PC, Tablet or Mobile Phone to control the system.

U-VISION
Hand held display with system, keypad.

U-TANK

Provides real time inventory control and manages a variety of alarm systems.
